

Course Set-Up Instructions

Step One

Separate the 10 flag holders from the remaining 10 hole liners and set liners aside. The flag holder have a recessed ring to insert flag pole. Apply Glue to the bottom of each flag holder liner within the ring and insert flag pole. (image 1)

Step Two

Choose your course location. Course size and terrain can vary based on desired difficulty and space available. Courses can be in a small yard or spread out on larger properties.

Step Three

Place each hole liner at the desired hole location. Place hole liner number one then two etc. The holes are played in sequence. The tee off point for each subsequent hole is within two club lengths of the previous hole. Clear any obstacles that may block access to hole location.

Step Four

Dig your holes approximately 8" diameter and place liners 1-2 inches below the surface. This allows the ball to easily fall into the hole. Add dirt around the outside of hole liner and smooth all loose dirt. (Image 2 & 3)

Step Five

Place a Yellow Flag Marker in the ground 18 inches directly behind each hole as seen from the prior hole. From shooters position the flag should mark the location behind the hole to indicate its location. Place the weighted flag pole liner on flag marker. (image 4)

During game play the flag must be seen (18" behind the hole) to know where to shoot.

Step Six

Add loose dirt or rock to flag holders to weigh down. (image 5)

Step Seven

Determine the par (3, 4 or 5) and apply the appropriate par sticker from your kit. (Image 6)

Par 3 = Shorter distance with no major obstacles

Par 4 = Longer distance plus an obstacle or some added difficulty

Par 5 = Longer distance with multiple obstacles and added difficulty.
